Y-TOOL

Run Survey Tools below an ESP

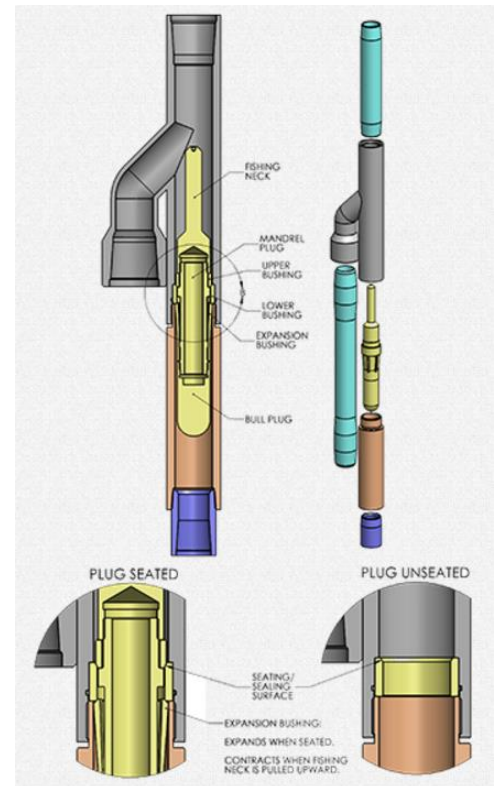

The Production Tool Solution Y-Tool is a proven bypass tool utilized when operators need to run survey tools below their Electrical Submersible Pump without first pulling the system. Designed and Tested in California, the PTS Y-Tool offers superior flexibility at a reduced price through its fit-for purpose design, elimination of a tubing swivel, and suitable for conventional wireline plugs. Additionally, the PTS Y-tool can be run in tandem to offer redundant ESP systems where workover costs are high.

Applications:

- Conventional O&G
- Unconventional O&G
- Offshore O&G
- Gas Well Dewatering

Benefits:

- Machined Design
- Standard Wireline Tools
- Fit-for-purpose

Casing Size	Bypass ID	ESP Size
7"	1-1/8"	300 Series
7"	1-1/2"	300 Series
9-5/8"	1-1/2"	400 Series
9-5/8"	2-1/4"	400 Series
9-5/8"	2-3/4"	400 Series
10-3/4"	2-3/4"	500 Series

The PTS Y-tool demonstrates a proven history of success in both onshore and offshore oil and gas applications. For further information or additional sizes, please contact your local Production Tool Solution representative or visit the website at www.ptsprotects.com
